## Victory Voice optimizes task assignments across pick, pack, and ship for a fully automated order fulfillment operation.

### Optimized Picking Processes

- Each & case picking
- Voice-directed batch picking of 12 to 25 orders
- Pick to tote or carton
- Conveyor, cart, fork truck pick processes
- Each, mixed case, and pallet picking
- Capture lot and sell-by dates
- At pick confirmation - print order or carrier label for auto-manifesting and shipping

### Voice-Directed Packing & Shipping

- Fixed or mobile workstations to direct value-add packing processes
- Put wall order consolidation
- QC audit-inspect
- Case sorting
- Pallet build content validation
- Multi-carrier parcel manifesting

### Labor Management and Productivity Tracking

- Tracks operator productivity and accuracy by work tasks and performance in each zone

Warehouse Execution and Control System Integrates with any ERP/WMS System  
Scaleable Software  
Automation Modules
