

RxPack™ Robotic Bottle Pack System

About The Numina Group

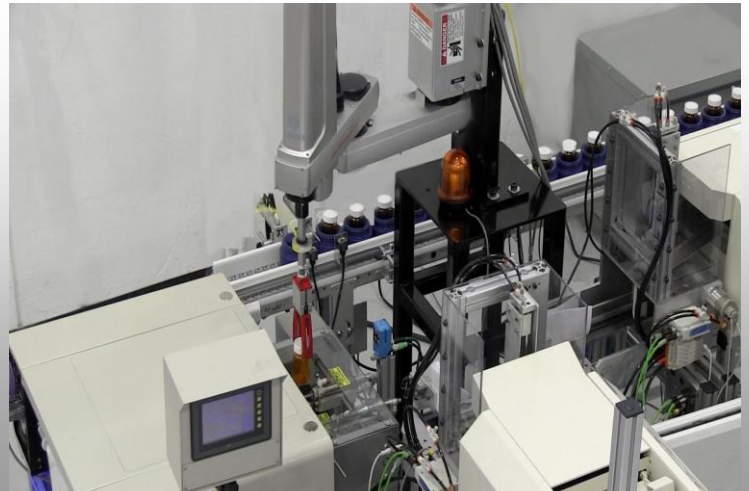

Numina Group has over 25 years experience in Warehouse Controls Systems (WCS) and integration of material handling automation. Our services include design and implementation of automation and validation for manufacturing & distribution operations.

Core strengths are focused in design and implementation of Pick, Pack, and Ship order fulfillment process improvement. Numina Group offers a full range of services from consulting/design, control system upgrades/process improvements to fully integrated turn-key distribution operations. Numina Group's expertise eliminates operational bottlenecks and excessive labor while improving accuracy and throughput across the entire order fulfillment and distribution operation.

Utilizing the latest in robotic technology Numina Group's RxPack™ auto packs 700 or more mail order pharmacy orders per hour. It includes a redundant print, fold, and insert lit pack system.

RxPack™ meets emerging FDA validation standards and simultaneously packs mixed single and multi-bottle prescriptions faster, error free, with reduced labor.

- Processes over 700 orders per hour
- Designed to meet FDA validation standards
- Replaces 5 or more manual pack stations
- Simultaneously processes mixed single and multi-bottle orders
- Integrated scale for weight check & manifesting
- Less than one year ROI
